EDUCATION

University of Toronto

Sept. 2014 – June 2019

Honours Bachelor of Science – Information Security Specialist & Minor in Mathematics

Relevant Coursework Completed:

- Data Structures and Algorithms
- Databases and Web programming
- Operating Systems
- Computer and Information Security
- Computer Networking
- Software Design and Engineering
- Computer Complexity and Computability
- Machine Learning and Data Mining
- Computer Forensics
- Algorithm Design and Analysis
- Artificial Intelligence
- Algebraic Cryptography

TECHNICAL SKILLS

Programming Languages:

Python, Java, C, Bash, Perl,
Standard ML, Prolog, Scheme,
MIPS Assembly, JavaScript

Technologies and Tools:

Windows, Linux, Git, LaTeX,
Wireshark, AXIOM, OSINT, VMWare,
KaliLinux

Development Methods:

Scrum, Agile, UML, OOP

PROJECTS

Penetration Testing and System Hardening

- Tested a vulnerable website hosted on a local VM using the OWASP Top 10
- Wrote an in-depth step-by-step report which could be followed by another individual with any amount of technical background to reproduce the discovered results

Mediums and Methods: Linux, PHP, HTML, JavaScript, SQL, Wireshark

Software Engineering (Game Development): Zombie Town

- Created a 2D top-down shooter, with the objective being to survive the endless waves of zombies
- Divided work evenly and catered the tasks to the skills of all members in the group in order to maximize workflow

Mediums and Methods: MySQL, Tiled, Java (Slick2D, LWJGL, JORBIS), PivotalTracker, MVC

EXPERIENCE

Think Green Lighting (TGL) – Project Manager

Sept. 2017 – Sept. 2018

- Planned meetings, and devised plans to complete a part of a multimillion-dollar project
- In charge of leading a team of electricians, training new recruits, and ordered all necessary supplies
- Wrote daily reports to update key stakeholders about the progression of the current tasks at hand

Think Green Lighting (TGL) – Work Site Supervisor and Labor Worker

June 2016 – Aug. 2016

- Managed multiple tasks and assigned them to others to ensure optimal workflow
- Ensured that all safety and company regulations were being followed by all workers on site
- Documented all activities and progress, then sent a final draft to the Project manager

ACTIVITIES & EXTRACURRICULARS

Ethical Hacking – Capture the Flag Competition

- This competition used Krypton Wargames, which is based on cryptography and cryptanalysis
- Participated in the competition and was the fastest team to capture the most flags
- More cool stuff
- A little bit more stuff to flex on the previous resumé
- pls gib job
- no monie in wallet or bank
- me poor
- I press keybord very fast
- I brain big
